COFFEE SUPPLY AND DISTRIBUTION IN PRODUCING COUNTRIES,
1960/61--1986/87

This circular updates Foreign Agricultural Circular FCOF 3-85 published in December 1985.

Data on area, tree population, production by type, trade, consumption, and stocks cover the 27-year period, 1960/61-1986/87, on a marketing year basis. Data for 1985/86 are preliminary and subject to revision; data for 1986/87 are forecasts.

Because starting dates for marketing years vary, annual regional and world totals are sums of the data for each producer's marketing year rather than world levels at a particular time. Totals for stocks for example, are the sum of stocks in individual producing countries at the beginning or end of their specified marketing years (normally when stocks are at or near their lowest annual level).

Coffee production estimates for some countries contained in this report differ from the first official USDA release made earlier this year (USDA Weekly Roundup, June 18, 1986) due to changes for certain countries made since the June release. In addition, two new countries, Sri Lanka and Zambia, have been added. USDA's second official estimate of world coffee production for 1986/87 and revisions for 1985/86 will be released December 10, 1986. Figures for exports and stocks for some countries also have been updated from those contained in World Coffee Situation Circular FCOF 2-86 released in July 1986 based on new information.

The figures under the column heading IMPORTS indicate entries into producing countries and generally are processed products for domestic use.

Some coffee moves unofficially between neighboring producing countries. Because it is virtually impossible to determine the magnitude of these movements, such coffee is listed as production for the country from which it is officially exported.

In a few countries, domestic use data include coffee used for nonbeverage purposes or stocks that have deteriorated or been destroyed. Because data are not complete on area, tree numbers, and average yields, world and regional totals are not shown.

Do you need information about

- Overseas markets and buying trends?
- New competitors and products?
- Trade policy developments?
- Overseas promotional activities?

Then **Foreign Agriculture** — USDA's fact-filled monthly agricultural trade magazine — is for you. Based on official USDA data available nowhere else, **Foreign Agriculture** articles are clear and crisp, written to provide the export information you need, in a concise and extremely readable form.

Special information is found in **Foreign Agriculture's** telegraphed, targeted news departments: Fact File, Country Briefs, Trade Updates and Marketing News. And its tables and graphs will give you an immediate grasp of what's going on overseas.

In addition, periodic special issues—such as the one devoted entirely to value-added exports—will give you a wide range of detailed information about overseas markets.

If you use agricultural facts and figures in your business, you need **Foreign Agriculture.**

Subscribe today! Just $16.00 ($20.00 for foreign delivery) brings you Foreign Agriculture for 12 full months.
